

PROJECT PROFILE

Project

PA Hall Demolition
Demolition

Location

Philadelphia, PA

H&K Company

Haines & Kibblehouse, Inc., Philadelphia, PA

Client

AP / Cruz Construction

Project Info

Imploded 7-story 274,000 sq. ft. convention center building.

Interior demolition of concrete walls, ceilings, electronics, and machinery.

Employed 500 ton crane to remove 9x20' precast concrete panels from exterior of building.

Project was constrained by nearby active construction site on east side, within 50 ft. of building and high voltage power lines within 35 ft. of building. AMTRAK and SEPTA rails were also less than 50 ft. from the site. Constant safety plans and meetings were a necessity for this project.

Explosives were handled by CDI Controlled Demolition, Inc. Once building was down we removed 3,200 tons of scrap steel, 11,150 tons of concrete and block, and 1350 tons of other construction debris.
